**2nd August 2015**

## **Communiqué on the Establishment of Government Schools**

Concluding in August, the Interim Prosperity Government will establish and supply a new government schooling system. It will effectively consolidate existing state schools established during and prior to Occupation, independent faith schools, and technical and vocational schools under the Interim Ministry of Education.

The provision of new schooling for Vekllei children is part of the foundational and eternal commitment of the 4th Commonwealth to light all corners of the Commonwealth, raise the standard of living for the common person and develop a knowledgable and intelligent economy on which future prosperity can be assured.

The Parliament of the 4th Commonwealth advises the following.

1. Education is a founding aspect of the 4th Commonwealth and is to be reaffirmed constantly and faithfully by all Parliaments and public servants, and to this end is to be provided for as a highest priority of the new Parliament.
2. Education is a mission of the dignity and worth of the common person, as protected in Document No. 1, and is to be considered a requirement of that Document.
3. The basis of success for the Interim Ministry of Education is to be the accessibility and quality of schooling for the Vekllei child, and the provision of all goods necessary to furnish a modern and progressive education.

These guiding principles are the lights by which the 4th Commonwealth is to reaffirm the future of our children and their spirit is to be revived in every Ministry and subordinate.
